

# Mariano Damián Macías Gandulfo

Full Stack Developer | Frontend Specialist (React & TypeScript) & Node.js / NestJS Backend

Valencia, Spain (Remote / Hybrid) | Spanish & Argentine Citizenship (EU Work Authorization) | +34 623 912 847

[mariano.maciasgandulfo@gmail.com](mailto:mariano.maciasgandulfo@gmail.com) | [linkedin.com/in/marianomacias/](https://www.linkedin.com/in/marianomacias/) | [github.com/soldiersnake](https://github.com/soldiersnake)

## Professional Summary

Software Developer with formal university technical education in Systems and extensive experience across the JavaScript / TypeScript ecosystem (React, Node.js, Express, NestJS). Specialized in architecting scalable interfaces, integrating enterprise Design Systems, and engineering high-reliability solutions for digital banking (OpenBank – Santander Group) and insurance platforms. Hands-on experience developing modular server architectures with NestJS and RESTful microservices. Proficient in leveraging AI-assisted development workflows (Claude, Cursor, Gemini) to accelerate feature delivery, refactoring, and test automation. Proven technical communicator and leader with 3+ years mentoring over 500 developers in MERN stack engineering.

## Work Experience

### Frontend Developer (React & TypeScript) — Disid / Plexus Tech (Client: Detriavall – Vetland CMS) Apr 2026 – Present | Valencia, Spain (Remote)

Insurance Technology / Pet Insurance Platform

- Developed and maintain core modules of Vetland CMS, a React-based backoffice for a pet insurance platform, delivering full CRUD flows for Notifications (draft/scheduled sending, editing, deletion) and Onboarding (drag-and-drop step reordering with @dnd-kit).
- Built the frontend with React 19, TypeScript, Vite, MUI v9, and TanStack Query v5, integrating with a Quarkus backend connected to MuleSoft/Salesforce while coordinating with parallel Flutter mobile and backend teams.
- Designed and specified the authentication architecture: Firebase-based Microsoft 365 SSO issuing backend JWTs, with an environment-toggle legacy email/password fallback for controlled rollout.
- Established an MSW-based mocking layer with in-memory per-domain data stores, enabling fully backend-independent frontend development and testing.
- Authored Spanish-language, onboarding-oriented technical documentation in Confluence to support team knowledge transfer.

### Frontend Developer (React & TypeScript) — Disid / Plexus Tech (Client: OpenBank – Santander Group)

Apr 2025 – Apr 2026 | Valencia, Spain (Remote)

Financial Services / Digital Banking

- Engineered and maintained the mission-critical bank transfers module for OpenBank, adhering to stringent financial security, performance, and compliance standards.
- Integrated modular UI components consumed directly from the internal enterprise Design System using Styled Components and interactive documentation in Storybook, ensuring UI/UX consistency and accelerating delivery cycles.
- Implemented strict typing with TypeScript and built comprehensive unit and integration test suites using Jest and React Testing Library to guarantee absolute reliability across financial transactions.
- Collaborated actively in Scrum ceremonies, rigorous code reviews, production defect triaging, and banking RESTful API integrations.
- Enhanced development speed and code quality by applying AI-assisted workflows (Claude, Gemini) for edge-case test generation and technical documentation.

### Frontend & Full Stack Developer (React & NestJS) — Excelia (Client: IDEAUTO)

Dec 2024 – Apr 2025 | Remote (Spain)

Insurance & Automotive Tech

- Developed and deployed a full-featured web platform for document digitization in vehicle sales, purchases, and leasing agreements for IDEAUTO insurance.
- Seamlessly integrated React/TypeScript client interfaces with backend services engineered in NestJS, actively diagnosing and debugging modular server logic and REST endpoints.
- Led rapid bug resolution and refactored legacy codebases upon project onboarding, adapting component architecture to evolving client requirements under tight delivery constraints.
- Managed version control and automated continuous integration/deployment (CI/CD) pipelines across staging and pre-production using Azure DevOps, Fork, and secure VPNs.
- Delivered 100% accessible, responsive web interfaces under agile Scrum methodologies, optimizing user workflows for document upload and verification.

### Full Stack Developer (.NET & React) — Disbyte

May 2022 – Dec 2024 | Buenos Aires, Argentina (Remote)

Enterprise Software Solutions

- Architected and developed enterprise-grade web applications utilizing React, TypeScript, and Material UI (MUI), customizing component libraries to align with corporate business workflows.

- Built and maintained backend endpoints using .NET / C#, implementing controllers, routing architecture, and resolving complex CORS and API security configurations.
- Diagnosed and patched production bugs while mentoring junior developers on Full Stack architectural standards and clean coding practices.

MERN Stack Instructor & Technical Mentor (React & Node.js) — CoderHouse

Feb 2022 – Present | Remote

EdTech & Engineering Mentorship

- Taught and mentored 10+ cohorts (+500 students) in modern MERN stack development (MongoDB, Express, React, Node.js), consistently achieving an 80%+ graduation and satisfaction rate.
- Conducted in-depth code reviews and architectural audits, assessing academic integrity, design patterns, clean code principles, and asynchronous state management in final capstone projects.
- Led live technical troubleshooting sessions, equipping students with practical debugging skills and industry-aligned best practices.

Featured Projects & AI Innovation

Cash Wise App — Financial Assistant with Integrated Chat — University Capstone Project

- Built the entire React frontend of a financial platform — including UI, styling, the OpenAI API integration for a conversational assistant, and project deployments — an early example of adding chat functionality to a financial app at the time.
- Team project; the backend (PHP) was developed exclusively by a teammate.

Modular Multi-Tool AI Hub — Frontend Architecture & Generative AI

- Engineered a modular dashboard in React / TypeScript consuming generative AI APIs for multi-purpose capabilities: contextual translation, image generation/editing, and tailored domain assistants.
- Implemented decoupled component architecture with optimized state handling to deliver sub-second UI interactions.

Technical Skills

**Frontend & UI:** React.js, TypeScript, JavaScript (ES6+), Vite, TanStack Query, Styled Components, Material UI (MUI), Tailwind CSS, Bootstrap, Redux, Storybook, HTML5 / CSS3 Responsive Design.

**Backend & Databases:** Node.js, NestJS, Express.js, .NET (C# foundational/intermediate), MongoDB, SQL (MySQL / PostgreSQL), Sequelize ORM, TypeORM / Prisma, Firebase / Firestore, RESTful APIs Architecture.

**Testing & Quality:** Jest, React Testing Library, MSW (Mock Service Worker), Code Reviews, Clean Code, Modular Architecture, Design Patterns (Dependency Injection, MVC, Component-Driven).

**AI-Assisted Development:** LLM API Integrations (OpenAI, Anthropic Claude, Google Gemini), AI Workflows & Tooling (Claude Code, Cursor, OpenCode), Prompt Engineering for Code Generation & Refactoring.

**Tools & Methodologies:** Git, GitHub, Azure DevOps, Firebase, Confluence, Postman, Fork, VS Code, Scrum / Agile Methodologies.

Languages

**Spanish:** Native

**English:** Professional Working Proficiency (B2)

Education & Technical Training

Associate Degree in Systems (Tecnatura Universitaria en Sistemas) — UTN

(Universidad Tecnológica Nacional)

2021 – 2023 | Graduated

Advanced Backend Architecture in NestJS — Continuous Professional Training

Modular architecture patterns, dependency injection, DTOs, request validation, and scalable Node.js API design.

2024 – 2025

Full Stack Web Development (Intensive Bootcamp) — Digital House

2021 – 2022 | Completed

University Certifications in Web Development — UTN

Certifications in Advanced React.js, Frontend and Backend Web Engineering.

2019 – 2020

Additional Professional Experience

**Danone — Commercial Account Executive (2011 – 2019):** Managed corporate client portfolios and optimized retail points of sale, establishing strong negotiation, client relations, and cross-functional communication skills.
